# FIND YOUR SOLUTION

BEAMS | DISPLACEMENT | RADIANT | UNDERFLOOR | VAV DIFFUSERS

## COMFORT

Price high-performance solutions can prioritize thermal comfort in challenging applications. Through zones of control, stratified air distribution or other solutions, Price high-performance systems can allow for individualized temperature settings, reduced draft risk, no dumping and improved room air movement.

## ENERGY SAVINGS

High-performance solutions allow for low-energy consumption. Our energy efficient systems have been proven to provide 10%-67% energy savings when compared to other more traditional HVAC systems.

## SUSTAINABILITY

For sustaining long-term usefulness, Price's high-performance solutions have modular options that ensure no comfort zones are split when office walls are put up or moved. The modular concept and flexibility provided by these systems guarantees that any changes in the floor plan will not trigger expensive and disruptive changes.

## KEY CONTACTS

Bringing more than 100 years of combined experience, the team behind our innovative engineered products is committed to providing high-performance system solutions customized for any project requirements.
